

MAHTAB ANSARI

Front-End Developer

Summary

Front-end Web Developer with nearly 5 years of experience in the banking sector, delivering large-scale projects such as internet and mobile banking. Skilled in building high-traffic financial applications using React.js and Next.js, with a strong focus on UX, performance optimization, and design systems. Experienced in Agile collaboration and delivering fast, reliable solutions within cross-functional teams.

Experience

Danesh Refah Pardis ([DRP CO](#))

Jun 2020 – Present

Front-End Developer

- Refactored a legacy internet banking system using Next.js and Material-UI, improving UX and customer satisfaction.
- Developed scalable, data-driven forms with complex validations using reusable components, minimizing code duplication.
- Optimized front-end performance for heavy reports by implementing pagination and lazy loading, ensuring smooth rendering of large datasets.
- Implemented JWT-based client-side authentication with session timeout, strengthening security and protecting sensitive routes.
- Delivered tailored banking services with secure role-based access, including reporting features, for retail and corporate clients..

DPI CO ([Former IBM Representative](#))

Jun 2021 – Jun 2022

Front-End Developer

- Built a PWA mobile banking platform handling over 150 banking operations using React.js.
- Boosted user adoption of accessibility features by 30% through implementing speech-to-text search and dark mode.
- Developed dynamic, data-driven forms with complex validations, adaptable to multiple data models, reducing user transaction errors by approximately 20%.
- Implemented client-side security using OTP and JWT authentication, enhancing fraud prevention and user account protection.

DPI CO ([Former IBM Representative](#))

Jul 2019 – Dec 2019

Front-End Intern

- Gained practical experience in React.js, Bootstrap, and responsive design by implementing functional features and solving development challenges.
